Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

### INSTALLATION:

1. Remove the bolt assembly, stock air filter and air filter support frame. None of these parts will be used with the K&N Air Filter. (Fig. 1)
2. Carefully clean the inside of the air box where the air filter will sit.
3. Install the provided aluminum spacer in the K&N Air Filter, and place the rubber and steel washers on the provided wing bolt as shown. (Fig. 2)
4. With the bolt assembly installed in the top of the K&N Air Filter, slide the Air Filter assembly side ways in the air box. (Fig. 3)
5. Position the K&N Air Filter in the air box in such a way that the rubber post on the filter top is rest ing against the air box wall. Make sure the Air Filter bottom seal is following the contour of the steel air box base plate. (Fig. 4)
6. Tighten the wing bolt. (Fig. 5)

### Available to purchase separately

Drycharger Wrap; KA-4408DK

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
