Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

**If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.**

### INSTALLATION:

1. Remove the stock air filter.
2. Remove the stock o-ring where the air filter seals. (Fig. 1)  
**NOTE: Do not remove the o-ring for the air box lid otherwise the air box will not seal correctly. (Fig. 2)**
3. Install the K&N® air filter. (Fig. 3)
4. Go around the perimeter of the K&N® air filter and make sure it is completely seated in the o-ring groove.
5. Reinstall the air box lid and tighten the stock screws.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
